APP TUR4ALL

[TUR4all](#) is a mobile app and the [accessible tourism website](#) promoted by [PREDIF](#) and [Fundación Vodafone España](#). Our aim is to enable people with accessibility requirements to travel, enjoy tourist destinations and take part in leisure activities just like any other tourists.

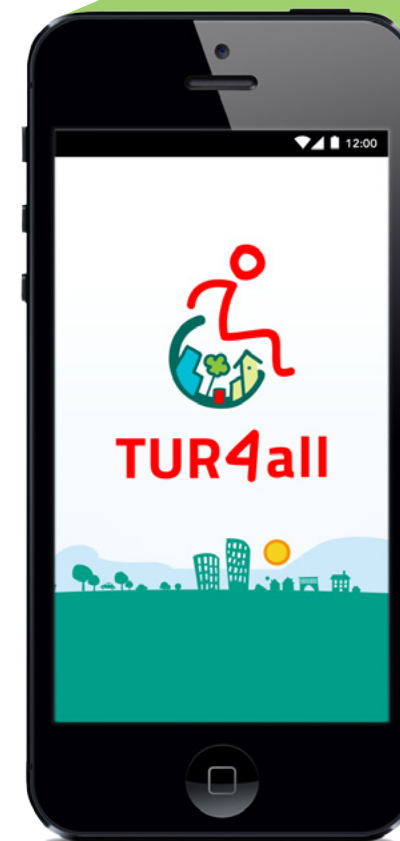

On TUR4all details of tourist resources that have been assessed by accessibility experts and included by users through an evaluation questionnaire are published.

TUR4all offers:

- Objective information on places to stay, places to eat, things to do in tourist destinations and how accessible they are.
- Information in 11 languages: Spanish, English, French, German, Portuguese, Italian, Mandarin, Catalan, Valencian, Basque and Galician.
- Interaction with social networks.
- An active community of users who assess, rate and comment on the accessibility of tourist establishments.
- A channel for promoting accessible tourist establishments and destinations.

At PREDIF, we want to use TUR4all to promote accessible tourism around the world. We also offer a tool for tourists with accessibility requirements that enables them to share information about accessible destinations and experiences that help others feel more confident about travelling.

In addition, we want to raise awareness in tourist destinations and establishments about how accessibility can boost their growth and development and benefit their business.
